FPA-1000 Fire Alarm Control Panel

BOSCH
Invented for life

Ease of use and reliability for real world applications.

The FPA-1000 is designed to simplify the process of fire detection and notification in small to midsize applications. Combining several innovative features not offered in other systems of its class, the FPA-1000 sets new standards for ease and reliability, price and performance.

FPA-1000-UL Compact Fire Panel
FPA-1000 Fire Alarm panel delivers the reliability of analog/addressable fire detection. Built with field-proven Bosch technology, you can count on the FPA-1000 for years of trouble-free service.

Designed for simplicity
The FPA-1000 is designed to simplify maintenance, testing and reporting. Clear indicators and straight-forward controls make the system easy to operate day-to-day and in an emergency.

IP-based programming and reporting
IP-based programming and reporting enables seamless integration into your existing IT infrastructure. The results are greater control, greater accessibility and lower long-term costs.

Future-proofed with scalable design
Despite its low upfront costs, the FPA-1000 can be easily upgraded with minimal expense as your requirements evolve.

The FPA-1000 can be used in a wide range of commercial and public building applications such as retail, schools, universities, manufacturing plants, and health care facilities.

Setting a new standard

The FPA-1000 sets a new standard for mid-size fire applications, providing a flexible solution to your business needs and a vital element to your facility's fire and life safety strategy.
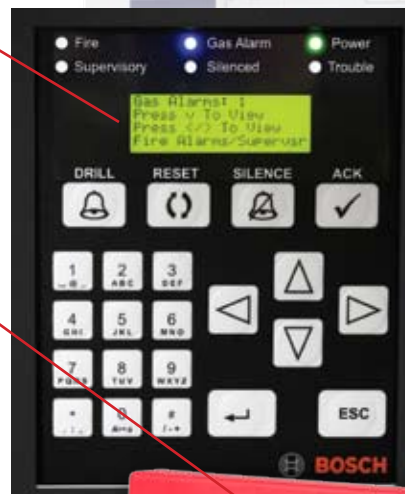

On-board web server

Built-in web pages enable remote management from virtually anywhere on the network.

Quick recognition and control

Clean, intuitive design, simple menu-driven display, easy-access keypad... all features that simplify maintenance, testing and reporting for both you and first responders.

Gas detection and alarming

An industry first, FPA-1000 alarms for carbon monoxide and other hazardous gases providing life-saving functionality while meeting NFPA 720 code and reducing costs.
